

Dave Lachance

**Vice President, Reservoir Development
BP Exploration (Alaska) Inc.**

Key Accountabilities

As Vice President of Reservoir Development for BP in Alaska, Dave is responsible for all aspects of subsurface delivery: resource identification, evaluation, development, production, new wells, well optimization, well work, and the 130 people who work in the subsurface for BP in Alaska.

Education

Dave has a mechanical engineering degree from Oklahoma State University and is a Registered Professional Engineer in the State of Colorado. He also trained as a petrophysicist at the Amoco Research Center.

Career

Dave arrived in Alaska in the summer of 2013. He has been employed with BP for over 39 years, starting in the Rocky Mountains with Amoco in the late 1970's. His background now covers seven countries and at least fourteen BP business units; his experience covers most all types of oil and gas reservoirs and operations, onshore and offshore, including support for LNG plants in Trinidad and Indonesia. Prior to Alaska, he was VP of Reservoir Development in Asia Pacific and in Canada. He is a member of the Society of Petroleum Engineers and has authored several technical papers.

Personal

Dave is married to Sherri and has three children and two grandchildren. He and Sherri very much enjoy living in Alaska.
